Quality
ISO 9001

Powersafe Portable Lighting Range

The Powersafe temporary lighting range is designed for illuminating your construction, mining, work site, or anywhere portable lighting may be required. The range can be powered from various sources including 240V or 12-24V DC. All lights use LED Tubes which prove to be more economical and increase safety without the use of sodium bulbs which require specialised disposal.

**High Output LED Tubes
NOT fluorescent (OHS)**

12-24V DC Available

Emergency Battery Backup

Optional stand available to fit all models -
